

SmartestEnergy job adverts - four posts -

SmartestEnergy is the UK's leading consolidator of power for the independent generation sector. Set up in 2001 to exploit opportunities in the newly-liberalised energy markets, it has grown strongly year on year and now manages a portfolio in excess of 1GW.

The company consists of 25 energy sector professionals based in the City of London and is now seeking to recruit four new team members to help the business expand into new segments of the market.

---

## Marketing Manager

Location: Midlands (home-based) + City

Competitive salary, bonus scheme and car allowance

Responsible for:

- the search and selection of customers
- the generation of counter-parties requiring off-take contracts or more structured deals
- the delivery of supply trading service contracts to large consumers

Educated to degree level, you will have solid experience of the UK energy industry and an understanding of the practical, political and regulatory challenges facing independent generators.

This is a high-profile, team player role, but the successful candidate will need to be self-motivated and must be prepared to travel throughout the UK.

Please send your CV to [tim-foster@smartestenergy.com](mailto:tim-foster@smartestenergy.com)

## Risk Management Analyst

Location: City

Competitive salary, bonus scheme

Responsible for:

- maintaining independently validated prices curves
- data analysis and correction, producing reports on a regular basis using desktop applications;
- liaison with counterparties regarding confirmation/portfolio reconciliation
- maintaining/formulating processes in the risk department
- contributing to defining risk methodology techniques
- developing models and systems to quantify and capture key risks
- Interpreting results and recommending action to mitigate or price for risk

Educated to degree level, preferably in an analytical/mathematically related subject, with a minimum of a 2.1. You will be very comfortable with numerical and analytical work and ideally have one to two years' business experience in a commodity trading or middle office environment. Self-motivated and a good communicator, you will also have good Excel, VBA and Access skills.

Please send your CV to [paul-finnerty@smartestenergy.com](mailto:paul-finnerty@smartestenergy.com)

---

## Assistant Accountant

Location: City

Competitive salary, bonus scheme and study support

Responsible for:

- managing the company's bank accounts online, checking statements and making payments
- calculating and placing available funds on overnight deposit
- maintaining the company's ledgers on SAP Business One
- processing invoices and matching to monthly generator statements
- processing all administrative and ad hoc expenses
- dealing with generators', OTC counterparties' and suppliers' queries
- dealing with auditors, Inland Revenue and HM Customs & Excise and 3<sup>rd</sup> parties
- month-end reconciliation of bank accounts, cash book, and ledgers
- assisting in the production of accurate and timely monthly accounts

Educated to degree level, you will be studying for a professional accountancy qualification (ACCA/CIMA). Strong experience of book-keeping and general accounting is essential. Able to show initiative and work largely unsupervised, you must be proficient in Excel and have good IT skills. Experience of SAP Business One and knowledge of the UK energy would also be most useful.

Please send your CV to [nitesh-shah@smartestenergy.com](mailto:nitesh-shah@smartestenergy.com)

## Forward Energy Manager

Location: City

Competitive salary, bonus scheme

Responsible for:

- maintaining the company forecast of the generation portfolio's expected forward position;
- completing the data analysis necessary to forecast the company's volume risk and take corrective hedging actions as required by the volume risk strategy;
- liaising with customers regarding their medium-long term operational plans;
- developing of prototype models to quantify the key risks effecting the company's volume position including: weather; individual customer VAR; and expected customer availability;
- interpreting results and recommending action to senior management regarding the most appropriate risk management strategy; and
- completion of weekly Front Office volume risk management report.

You will be a graduate preferably in an analytical/mathematically related subject. All degree disciplines will be considered although the role would suit someone who is comfortable with numerical and analytical work. You will have 1-2 years' business experience in commodity trading; Good Excel, VBA and access skills; Good communication and interpersonal skills; and be self-motivated.
